Allison,

The attached link will get you to DEQ's review of the Mid-Coast Ag Water quality management plan. It is interesting that the answers provided are transposed, i.e., the DOA comments are actually DEQ's comments and DEQ's comments are ODA's comments. Pay close attention to the monitoring and implementation questions. This is just one review. The other reviews by other DEQ staff are consistent with this one. We do have reviews for some of the other Coastal Areas besides the Mid-Coast.
